Memorandum

TO: Administration Committee
FR: Executive Director
RE: Contract Amendment: StreetSaver® Software Development: DevMecca.com LLC

DATE: September 3, 2008
W.I.: 1233

StreetSaver®, MTC's pavement management program (PMP), is designed to provide local jurisdictions with a set of recommendations for pavement preservation, in order to help them use their limited local street and road funding in the most cost-effective manner. Currently, all of the Bay Area's 109 jurisdictions use StreetSaver®, in addition to over 250 users nationwide. MTC uses StreetSaver® exclusively to report the pavement conditions for local streets and roads in the annual State of the System Report and to project the region's pavement needs and funding shortfalls.

In 2006, MTC retained DevMecca to provide ongoing software maintenance and support, future software updates and enhancements. The Committee approved a two-year contract, with the option to extend the contract for two additional one-year periods.

Staff recommends that this Committee authorize the Executive Director or his designee to negotiate and enter into a contract amendment with DevMecca.com for \$250,000 to provide ongoing software enhancement, maintenance and support such as, non-pavement asset management, PCI driven calculation, database conversion and migration, software bug fixes, service releases, and technical support through the end of FY 2008-09 for a total contract amount of \$474,860.
